

Dear Parents/carers

Re: Pharmacy First – an NHS service being offered from pharmacies across England for children and adults

With absence and attendance being a high priority for all schools and nurseries, I am writing to let you know about an NHS service which pharmacies across England are offering for children (as well as adults) called **Pharmacy First**.

What is Pharmacy First?

This service enables children and adults to get quick access to healthcare advice as they can walk into a pharmacy and access the service. The person will then be offered a consultation with a pharmacist in a private consultation room. This service takes away the potential delay of having to wait for a GP appointment and may help ensure children get well and back to school as quickly as possible, potentially positively impacting attendance rates.

The service supports the following conditions:

- **Earache** (aged 1 to 17 years)
- **Impetigo** (aged 1 year and over)
- **Infected insect bites** (aged 1 year and over)
- **Sore throats** (aged 5 years and over)
- **Shingles** (aged 18 years and over)
- **Sinusitis** (aged 12 years and over)
- **Urinary tract infections** (UTIs) in women (aged 16 to 64 years)

The pharmacist will provide advice and, if clinically necessary, offer an NHS medicine to treat the condition (these medicines are supplied free of charge to children under 16 years, with the normal [NHS prescription charge rules](#) applying to people aged 16 or over). The pharmacy will then send an electronic message to the person's GP surgery so their health record can be updated.

Should the pharmacist be unable to help, they will direct the person to their GP surgery or other health professional as appropriate.

A summary of the service and further information is available at nhs.uk/thinkpharmacyfirst

Yours faithfully

Miss Gribble
